

Emerging Leaders: An Annotated Bibliography

In an increasingly global, technology-driven marketplace, a key organizational challenge is the development of leaders from the newest generation of managers. This publication provides an introduction to the current thinking about and the relevant research into developing, working with, and retaining emerging leaders. Its goal is to help organizations understand the leadership development needs of emerging leaders, what learning styles they tend to use, what challenges they face in defining and shaping their careers, and what leadership challenges lie in working across generations.
