

Laboratory Evaluations for Integrative and Functional Medicine

Your evidence-based resource for the biochemical basis of chronic illness. A must-have desk reference for laboratory testing associated with nutritional and metabolic medicine. By respected authors Richard Lord, and J. Alexander Bralley. This book can be your single source reference for the testing most used in your practice to identify candidates for nutrient interventions and to evaluate toxic or metabolic issues. Whether you want to review the significance of a single measurement, or to interpret complex multiple profile data, you can quickly find the information you need to design effective treatments.
