

Economic Necessity, Political Contingency and the Limits of Post-Marxism (New Political Economy)

Post-Marxism emerged in the 1970s and 80s as a way to retain certain insights from Marxism while disposing of its indefensible and destructive elements, especially the tendency to reduce all social change to the economic base. This book offers a new and critical reading of post-Marxism, arguing that whilst it convincingly deconstructs the prevalent economism in Marxism as the necessary logic of social reproduction, it nonetheless still retains an ontology of a closed capitalist economy, inhabited by a set of necessary logics. Through a careful symptomatic reading of the works of influential post-Marxian thinkers, Ernesto Laclau and Etienne Balibar, the book argues that while post-Marxian positions have constructed a theory of social contingency, it has failed in different ways to dislodge the constitution of class and capitalist reproduction from essentialist narratives.
