

Physician Characteristics and Distribution in the U.S. (Physician Characteristics & Distribution in the United States)

Physician Characteristics and Distribution in the US, 2007 is the most accurate and complete source for statistical data about the physician supply in the United States. It provides extensive data on trends, characteristics and distribution of more than 902,053 physicians. Divided into five sections: Section One: Physician characteristics for age, sex, major professional activity, specialty and race; Section Two: Geographical distribution by state; Section Three: Specialty data for the nation, states, census regions, MSAs and counties; Section Four: Data for primary care including the activity, age, sex, board certification, school and year of graduation, IMG state of location and metro area; and, Section Five: Trend data for specialty, major professional activity, age and sex. Includes physician/population ratios for selected years.
