

# The physics of radiology, (American lecture series, publication no. 932. A monograph in the Bannerstone division of American lectures in radiation therapy)

Although it follows the topical outline that proved so successful in its earlier editions, the Fourth Edition of this respected book encompasses all of the advances and changes that have been made since last it was revised. It not only presents new ideas and information, it shifts its emphases to accurately reflect the inevitably changing perspectives in the field engendered by progress in the understanding of radiological physics.
