Optical soliton solutions of nonlinear evolution equations using Apr 28, 2010 Four M-component nonlinear evolution equations, namely the M-component Kortewegde Vries (KdV) equation, the M-component **New periodic and soliton solutions of nonlinear evolution equations** Sep 23, 2013 In this paper, the topological soliton solutions of nonlinear evolution equations are obtained by the solitary wave ansatz method. Under some parameter conditions, exact solitary wave solutions are obtained. **Optical soliton solutions of nonlinear evolution equations using** Oct 26, 2007 In this paper, the tanh and sine cosine methods are used to construct exact periodic and soliton solutions of nonlinear evolution equations **M-component nonlinear evolution equations: multiple soliton solutions New multi-soliton solutions of a (3+1)-dimensional nonlinear** Sep 2, 2010 Nonlinear Sciences > Exactly Solvable and Integrable Systems To find multiple soliton solutions for these well - known equations author has **Soliton solutions to a few fractional nonlinear evolution equations in** In this paper, applying homoclinic test approach to a (3+1)-dimensional nonlinear evolution equation, new kink breather soliton solutions are obtained. In addit. **Bilinearization and soliton solutions for some nonlinear evolution** Soliton Solutions of Non-linear Evolution Equations. N. C. FREEMAN. School of Mathematics,. University of Newcastle upon Tyne,. Newcastle upon Tyne NE/ **Soliton solutions to coupled nonlinear evolution equations** Feb 1, 2016 Soliton solutions are sought to a pair of coupled nonlinear partial differential equations which model the interface of two stratified ideal fluids **Topological soliton solutions for some nonlinear evolution equations** This paper exhibits the application of integrability aspects to a couple of nonlinear evolution equations. These are semi-inverse variational principle and the **Soliton solutions of nonlinear evolution equations in mathematical** May 25, 2016 Abstract. This paper studies a few nonlinear evolution equations that appear with fractional temporal evolution and fractional spatial derivatives. **New multi-soliton solutions of a (3+1)-dimensional nonlinear** Bilinearization and soliton solutions for some nonlinear evolution equations in fluids via

the Bell polynomials and auxiliary functions. Yan Jiang^{1,2}, Bo Tian^{1,2}, **Numerical study for soliton solutions of some nonlinear evolution** In this paper, the modified regularized long wave, the equal width and the modified equal width equations are solved by the Adomian decomposition method **New (3+1)-dimensional nonlinear evolution equation: multiple** Official Full-Text Publication: New Soliton Solutions for Systems of Nonlinear Evolution Equations by the Rational Sine-Cosine Method on ResearchGate, the Apr 1, 2016 In this paper, applying homoclinic test approach to a (3+1)-dimensional nonlinear evolution equation, new kink breather soliton solutions are **A Note on M-component nonlinear evolution equations: multiple** Specific descriptions on the formation mechanism of soliton solutions of non-linear, partial differential equations are given, and some methods for solving this **On the Multi-soliton Solutions of Some Nonlinear Evolution Equations New Soliton Solutions for Systems of Nonlinear Evolution Equations** Jul 18, 2014 In this work, we introduce an extended (3+1)-dimensional nonlinear evolution equation. We determine multiple soliton solutions by using the **New multi-soliton solutions of a (3+1)-dimensional nonlinear** Full-text (PDF) available on request for: New solitons solutions for systems of nonlinear evolution equations.. **Dark-Bright Soliton Solutions for Some Evolution Equations 1** New periodic and soliton solutions by application of Exp-function method for nonlinear evolution equations Solving nonlinear equations may guide authors to know the described process deeply and sometimes leads them to know some **New (3+1)-dimensional nonlinear evolution equations with mKdV** Apr 1, 2016 In this paper, applying homoclinic test approach to a (3+1)-dimensional nonlinear evolution equation, new kink breather soliton solutions are **Soliton Solutions for Nonlinear Evolution Equations with -SERSC** Dec 24, 2014 In this study, Hes semi-inverse variational principle is applied to obtain traveling wave solutions of the coupled nonlinear Schrodinger type **Derivation of soliton solutions to nonlinear evolution equations using** Apr 28, 2010 Four M-component nonlinear evolution equations, namely the M-component Kortewegde Vries (KdV) equation, the M-component **Bilinearization and soliton solutions for some nonlinear evolution** Optical soliton solutions of nonlinear evolution equations using ansatz method. Ozkan Gunera,?, Ahmet Bekirb, Fatih Karacab a Cankiri Karatekin University, **New (3+1)-dimensional nonlinear evolution equation - De Gruyter** We develop (3+1)-dimensional equations with mKdV constituting its main part. . We determine multiple soliton solutions. . We examine the constraint conditions **Nonlinear Evolution Equations and Soliton Solutions - Nova Science** solutions are obtained with the aid of the symbolic computation system Maple. Keywords: nonlinear evolution equations, soliton, Wronskian, exact solutions. 1. **M-component nonlinear evolution equations: multiple soliton solutions** Bilinearization and soliton solutions for some nonlinear evolution equations in fluids via the Bell polynomials and auxiliary functions. Yan Jiang^{1,2}, Bo Tian^{1,2}, **Optical soliton solutions for Schrodinger type nonlinear evolution** Oct 19, 2016 soliton solutions by using the simplified Hirota's method. In addition, we wide variety of nonlinear evolution equations. Moreover, the tanh **Nonlinear Evolution Equations and Soliton Solutions: Yucui Guo** Buy Nonlinear Evolution Equations and Soliton Solutions on ? FREE SHIPPING on qualified orders. **none** We analytically study the Schrodinger type nonlinear evolution equations by improved $\tan(\frac{?}{2})$ -expansion method. Explicit solutions are derived, which **New periodic and soliton solutions by application of Exp-function** Abstract. We use the Hirota's technique to find the multi-soliton solutions of some nonlinear evolution equations. The interaction of the solitons is studied.
